FARM LANDS for SALE.—The ILLINOIS TWO MILLION OF ACRES

TWO MILLION OF ACRES

IF ARM ING I, ANDS,

IF TRACTS OF FORTY ACRES AND UPWARD,

On CREDITS

LOW RATES OF CREDITS

LOW RATES OF THE REST.

LOW RATES OF THE STATE REST.

LOW RATES OF THE STATE REST.

These Lands were granted by the Government to aid in the construction of the Raitroad, and include some of the richast and most fettle Prairies in the State, interspread here and there with magnificent groves of oak and other timber. The Road extends from Chicago on the north-east to Cairo at the south, and from thence to Garena and Ducleith, in the north-west extreme of the State; and as all the lands lie within filtern miles on each side of this Road, ready and cheap means are afforded by it for transporting the preducts of the lands to any of those points, and from thence to Eastern and Southern markets. Moreover, the rapid growth of flourishing towns and villages along the line, and it great increase in population by immigration, &c., afford a substantial and growing home demand for ferm produce.

The soil is a dark, tich mold, from one to five feet in depth, is gently rolling, and peculiarly fitted for grazing Cattle and Sheep or the cultivation of Wheat, I coinn Corn, &c.

Eccnomy is cultivating and great procuetiveness are the well-known characteristics of Illinois lands. Trees are not required to be cut down, attumps grabbed, or stone picked off, as is generally the case in cultivating; ew land in the older States. The first cop of I tidan Corn, planted on the newly broken sod, usually repays the cent of plowing and facility.

Wheat sown on the newly proken sod, usually repays the cent of plowing and facility.

Wheat sown on the newly turned sod is sure to yield very large profits. A man with a low and two yoke of oxen will break one and a half to two eres per day. Contracts can be made for breaking ready for con nor wheat, at from \$2 to \$250 per acre. By judicious management the land may be plowed and feniced the first, and under a high state of cultivation the second year.

per acre. By judicious management the land may be plowed and fenced the first, and under a high state of cuitivation the second year.

Corn, Grain, Cattle, etc., will be forwarded at reasonable rates to Chicago for the Eastern market; and to Cairo for the Southern. The larger yield on the cheap lands of Illinois over the high priced lanes in the Eastern and Middle States is known to be much more than suificient to pay the difference of transportation to the Eastern market.

Bituminens Coal is mined at several points along the Road, and is a cheap and desirable feel. It can be delivered at several points along the Road at \$1.50 to \$4 per tan. Wood can be had at the same rates per cord.

Those who think of setting is lows or Minnesots should bear in mind that land, there of shy value, along the water-courses and for many miles inland, have been discosed of; that for those located in the interior there are no convenience for transporting the produce to market, rallicads not having been introduced there; that to send the produce of these lands one or two hundred miles by wagon to market would cost much more than the expense of cultivating them, and hence Givernment lands thus situated, at \$1.25 per sere, are not so good investments as the land of this Cempany at the prices fixed.

The same remerbs hold good to relation to the lands in Kansas and Nebraska, for although weart lands may be found nearer the water-courses, the distance to market is far greater, and every hundred miles the produce of these lands is carried either in wagons, or interrupted water communications, increases the expenses of transportation, which must be borne by the settlers, in the reduced prices of their products, and to that extent precisely are the incomes from their farms, and of course on their investments, annually and every year reduced.

The same in the court of transportation, which must be borne by the settlers, in the reduced prices of their products; and to that extent precisely are the incomes from their farms, and of course on

water of Sammer or the frost of Winter.

PRICE AND TERMS OF PAYMENT.

The price will vary from \$5 to \$25, according to location, quality, &c. Contracts for Doeds may be made during the year 1866, slipulating the purchase money to be paid in five annual installments—the first to become due in two years from the date of contract, and the others accountly thereafter. The last payment will be come due at the end of the sixth year from the date of the contract.

date of contract, and the others accurally thereafter. The last payment will be come due at the end of the sixth year from the date of the contract.

As a security to the performance of the contract, the first two years interest must be paid in advance, and it must be understood that at least one-tenth of the land purchased shall yearly be brought under cultivation. Longer credit, at six per cent per annum, may be negotiated by special application. Twenty per cent from the credit price will be deducted for each. The Company's construction bot is will be received as cash. Ready-frame Farm Buildings, which can be set up in a few days, can be obtained from responsible persons.

They will be 12 feet by 20 feet, divided into one living and three bedrooms, and will cost complete, set up on ground chosen any where along the read, at \$150 in cash, exclusive of transportation. Larger buildings may be contracted for at pronoution ato rates. The Company will forward all the materials for such buildings over their tood promptly.

Special arrai generals will desires can be made to supply those purchasing the Company's lands with faccing materials, agricultural tools, and outflet of provisions in any quantity, at the lowest who leads prices.

It is believed that the prices, long credit, and/low rate of interest charges of or these lands will enaber a man with a few maderial collars in each and ordinary incostry to make tonself independent hofore all the purchase money becomes due, in the mean time, the rapid settlement of the country will probably have increased their value form or fire field. Whan required, an experienced person will accompany applicants to give in form atom and atom is beloting late, according to the residence of the country will probably have increased their value form or fire field. Whan required, an experienced person will accompany applicants to give in formation and atom is selecting late, according to the residence of the flinings Central Rational-long, set. by cantract—or a y then information—will b

EAGLESWOOD SCHOOL, Perth Amboy, N. J. —Circulars to be had of the Principal, THEODURE D. WELD; or of C. SHEPARD & Co., No. 152 Fulton-st.

INSTITUTE for IMBECILES.—The undersigned, late Principal of the Pannsylvania Traming behool for
Miotic and Feeble minded Children, in accordance with the earnest request of a large number of influential g-ntlemen of this
city, will open a Private School for the Teaching and Training
of such children as cannot be developed by the ordinary methods.
He feels certain that there are many of this class of children
among the wealthy, whose parents for many reasons decline
sending them to a State Institution; and it is to meet the wants
of such that his school is intended.

The mans.on an grounds on 5th av. and 13ts-st., Harlem, are
being fitted with special reference to the accommodation of the
school, where he will be ready for the reception of pupils on
MONDAY, the 5th of June next. The location is both healthful
and beautifel.

and beautiful of the unit being of necessity limited. Parents and continuous of the number of a unit being of necessity limited. Parents and of nardane down it had an early application. If children are put in training before evil habits are confirmed, there is scarcely any case but admits of great improvement; while in many its starces, they can be fitted to engage in the ordinary avocation of life.

THE PATENT DOUBLE ICE PITCHERS.

When Woodworth sung so aweetly in craise of "the old oaken bucket," it was before the days of modern inventions. Now, the courtry people have "bloked the bucket," and draw water from their weds with a chain. To this of chaining up the water in this land of liberty! We may yet read of "The beautiful chain, the inon-linsed chain, The fine-plated chain that revolves in the well."

The thirsty clitzens must obtain their supplies of water through the underground process, and witned so warm as to require less omake it paintable which leads to a demand for Pitchers that will contain the ice a los g time before it meits. That demand can be supplied at the well-known stand at the frot of Johnest. Plated and Britannia Double ICE PITCHERS from \$5 to \$25, for sale at Nos. 4 and 6 Berling-slip, by LUCIUS HART. THOMAS PIG IRON—Soft, free, strong, and a warranted substitute for Scotch Pig.
